Why Buyers Choose Phoenix

13+ Years of Manufacturing

Our Guangzhou facility has built automotive cameras since 2013 - sensors, lenses, assembly and aging test lines under one roof. Every unit is burn-in tested 4-6 hours before packing.

Factory-Direct Pricing

Buying direct removes importer, distributor and retail margins - typically 30-50% of shelf price. The same production lines as many branded boxes, without the markup.

Quality You Can Verify

Incoming sensor and lens inspection, in-line functional test, sharpness and low-light charts, G-sensor calibration, per-batch drop and transport testing. Standing CE / UKCA / FCC / RoHS certifications.

OEM / ODM Ready

Private-label from 100-300 units on proven platforms: your logo, boot screen, packaging, manuals and firmware defaults. Branded app builds for WiFi/4G models. Full ODM from 1,000-3,000 units.

Wholesale Tiers

50-100 units: 10-20% off single pricing. 500+: packaging and firmware customization. Container programs quoted per program - write to us with your volume and market.

Support That Answers

Engineering replies within one business day. Firmware supported for the product's life, spare parts stocked through the warranty period.
